

The fund targets yield through investing in a portfolio of asset backed short to medium term private debt transactions. The fund targets a favourable risk adjusted yield for its investors by lending to clients that are under-served by more traditional bank and non-bank financial institutions. This scarcity of credit available to small and medium sized enterprises ("SMEs") is a global opportunity and allows the fund to select the best-in-class borrowers for the return premium charged. The investment manager shall use its presence on the continent and broad transaction sourcing abilities to capitalise on the expected growth in trade flows into and out of Africa.
